

**Memorandum - Inspection Notes**

**Subject: Knox County  
(Near Abingdon)**

**Ed Malone Cattle Feedlot  
Reconnaissance Inspection**

**To: DWPC/FOS and RU**

**From: Todd R. Huson, DWPC-FOS, Peoria Region**

**Date: April 18, 2012**

**Accompanied: Star Fowler, DWPC-FOS, Peoria Region**

On April 18, 2012, a reconnaissance inspection was performed at the Ed Malone Cattle Feedlot in Knox County. **Exemption 6 and Exemption 7(C)**  
Exemption 6 and Exemption 7(C)

This facility did not have any cattle during this inspection. However, a few small stock piles of manure and bedding were observed under roof on several concrete feedlots. Also, old feed was still being stored in the concrete commodity storage pad near the maintenance garage and on a few concrete feedlots. The east wastewater holding lagoon appeared to have ~6' of available freeboard and the contents appeared relatively clear. The west wastewater holding lagoon was not observed. Any overflow from the west lagoon drains overland into the east holding lagoon. The contents of the small pond serving the east feedlots are diverted through a drain line into the east holding lagoon. Gutters and downspouts have not been installed on any of the buildings. The weather was partly sunny and warm.
